Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: The reference to the claims should not be made in the specification. **Error! Bookmark not defined.** Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Schoenfelder (US 5 862 791).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3747

Claims 3-6, 9, 12-15 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schoenfelder (US 5 862 791). Schoenfelder discloses method for determining the actuator energy required for the different injection types of an actuator of an internal combustion engine, applying a control signal the actuator and setting an injection parameter of the internal combustion engine such that said actuator signal is generated at a specific stored time wherein a first injection type in at the combustion cycle is deactivated in order to determine an actuator energy of said type from at the second injection type (see abstract, Col. 2, lines 5-54, Col 5, lines 1-7, claims 7 and 10). The difference between the prior art reference and the instant invention are the use of the different type of injectors and the operation of the states. It would have been considered to be an obvious choice of mechanical design because one skilled in this art is familiar with basic actuator control system and normally has the laboratory test facilities. To optimize or select the suitable types and the operating condition would be within the ability of ordinary skilled in this art.

Allowable Subject Matter

Claims 7, 8, 16 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John T. Kwon whose telephone number is (571) 272-4846. The examiner can normally be reached on M-Th.
